Bay Property Management Group

www.baymgmtgroup.com

2,120

URLs crawled

5

templates speed-tested

172

pages content-scored

17

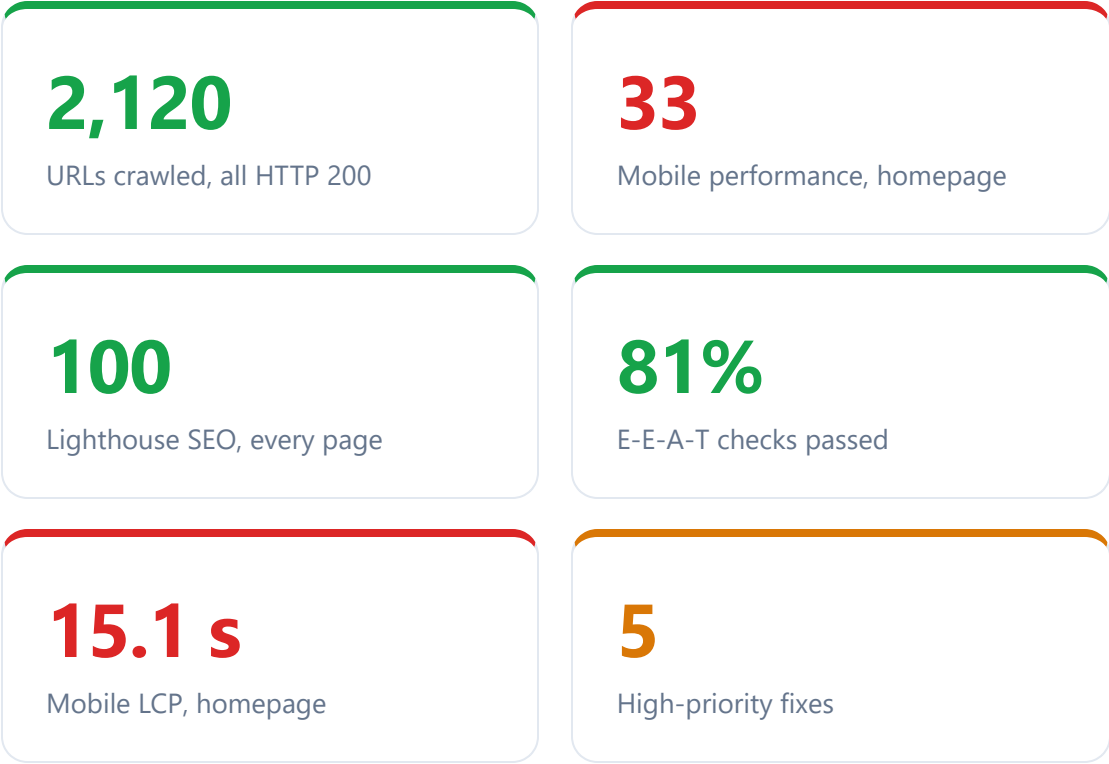

prioritised actions

A strong SEO foundation held back by mobile speed

The site is technically healthy: every sitemap URL resolves, schema coverage is excellent and the blog is deep. The losses are concentrated in **three fixable areas**.

- 1. **Mobile speed.** The hero image is lazy-loaded and three Google tag libraries block the page. LCP is 14 to 19 s in lab tests.
- 2. **Index hygiene.** Redirected and noindex URLs sit in the sitemap, and demo, duplicate and ad-copy pages are indexable.
- 3. **Template bugs.** The footer phone button on every page links to a broken address; all external links are nofollow.

The five high-priority fixes are configuration and template changes that can ship in about a week.

Scorecard by area

Technical SEO	Strong	All 2,120 URLs return 200, Lighthouse SEO 100, schema on every page.
Mobile speed	Critical	Mobile performance 33 to 53. Hero image appears after 14 to 19 s.
Index hygiene	Needs work	14 redirects + 42 noindex URLs in sitemap, 8+ indexable duplicates.
Internal links	Needs work	Broken footer phone link on every page, 4 broken links, 62 redirect hops.
Content	Good	Median post 2,097 words. Readability is hard (grade 13). 15 thin pages.
Trust / E-E-A-T	Good	56 of 69 checks pass. No Terms page, no public email, all links nofollow.
Accessibility	Needs work	Lighthouse 76 to 86. Zoom disabled, contrast and label issues.

Top 5 priorities

1

Fix the mobile hero image

Performance

WP Rocket lazy-loads the hero background, so the biggest element paints last (LCP 15.1 s on the homepage).

Fix: Exclude the hero container from 'LazyLoad for CSS background images', or use an with fetchpriority=high, and preload it.

Impact High

Effort Low

2

Cut third-party JavaScript

Performance

GTM, a separate GA4 gtag and a separate Ads gtag load ~530 KB; reCAPTCHA adds 356 KB on every page.

Fix: Fire GA4 and Ads from inside GTM only. Load reCAPTCHA and Formidable only on form pages or on interaction.

Impact High

Effort Medium

3

Repair the footer phone button

Links

On all 2,120 pages it links to [http://\(443\)%20708-4698](http://(443)%20708-4698), a broken web address.

Fix: Change the href to tel:+14437084698 and remove target=_blank and nofollow.

Impact High

Effort Low

4

Clean the XML sitemap

Indexing

Lists 14 URLs that redirect elsewhere and 42 job posts marked noindex.

Fix: Remove redirected pages; exclude the careers post type in Yoast or make job pages indexable.

Impact Medium

Effort Low

5

Remove duplicate and leftover pages

Indexing

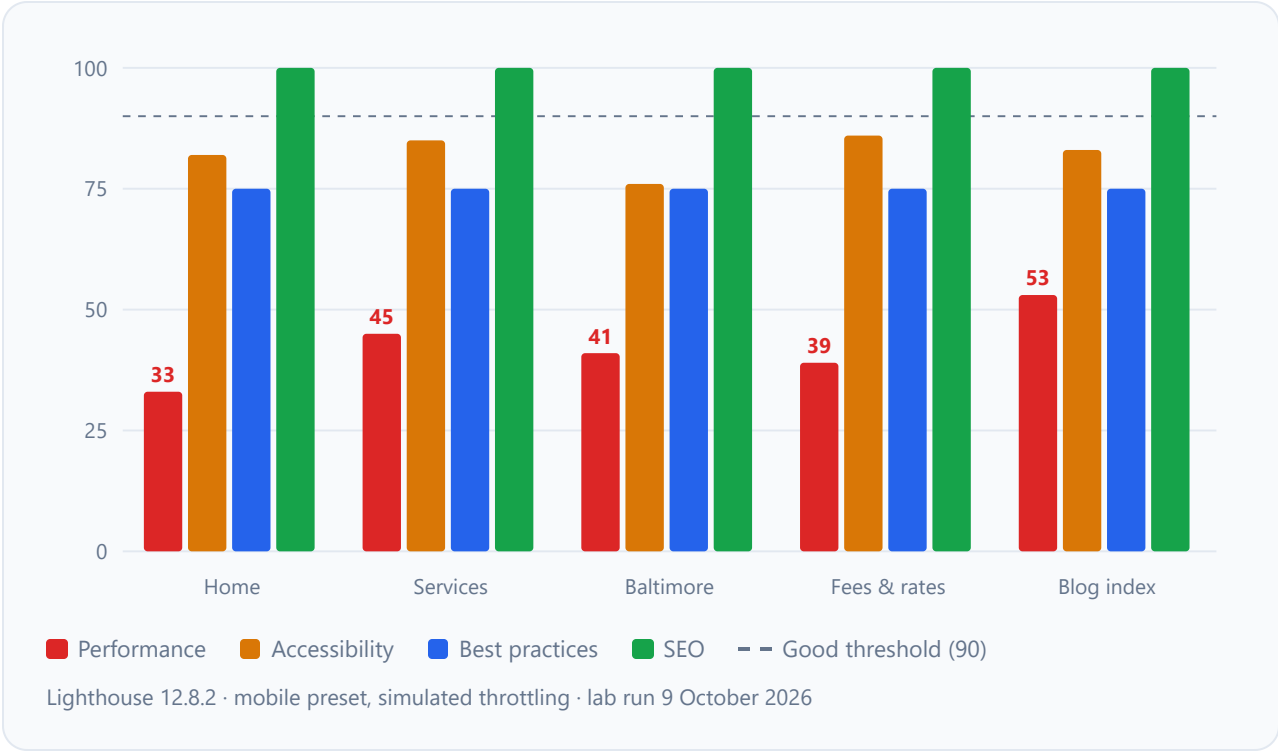

A theme demo post, a '-duplicate' page, two '-ga' ad copies and duplicate post pairs are all indexable.

Fix: Delete or 301 the demo and duplicate pages, merge post pairs, noindex the '-ga' pages and /unsubscribe/.

Impact Medium

Effort Low

Mobile speed is the biggest gap

PAGE	LCP	BLOCKING
Home	15.1 s	1,760 ms
Services	4.5 s	1,710 ms
Baltimore	19.3 s	650 ms
Fees & rates	14.4 s	770 ms
Blog index	3.7 s	1,490 ms

Root cause

The LCP element is the Elementor hero container. WP Rocket defers its background image, so it starts downloading only after scripts run.

Desktop is fine

Homepage desktop: performance 96, LCP 1.3 s. Server response is 30–50 ms, so this is purely front-end.

What weighs the page down

Script and asset weight on first load

Google tag libraries (×3)		~530 KB
reCAPTCHA		356 KB
Formidable Forms JS		150 KB
Facebook pixel		113 KB
Hero image (oversized 690→328 px)		43 KB

Transfer size from Lighthouse network audit, homepage and Baltimore page

1.6–2.6
MB

total page weight

3.2 s

JavaScript
execution (home)

4,833

DOM elements
(Baltimore)

Recommended changes

- **One tag manager.** Fire GA4 (G-5EXEYHEDLL) and Google Ads (AW-809934358) from inside GTM-5X3QGKN instead of separate gtag scripts.
- **Forms on demand.** Load reCAPTCHA and Formidable only on pages with a form, or when the user first interacts.
- **Hero first.** Exclude the hero from background lazy-load, add a preload, serve a 400 px mobile image.
- **Delay marketing pixels** until after the page is interactive (WP Rocket "Delay JS").

Target after fixes: mobile LCP under 2.5 s and Total Blocking Time under 300 ms.

Crawl and indexing health

CHECK	RESULT	STATUS
Sitemap URLs returning 200	2,120 / 2,120	OK
og:image on every page	2,120 / 2,120	OK
Article + Person schema on posts	1,883 / 1,885	OK
Tag archives and staging pages noindexed	1,633 + 9	OK
Sitemap URLs that redirect	14	Fix
Noindex URLs in sitemap	42	Fix
Missing meta description	99	Fix
Duplicate title groups	10	Fix
Titles over 60 characters	977	Review
Pages with no H1 / two H1s	5 / 12	Fix

1,885

blog posts

143

pages

92

categories + careers

Sitemap needs a clean-up

14 URLs in the sitemap redirect elsewhere (Cumberland, Lancaster and York County pages, baltimore-city-md, 3 resource pages) and all 42 career posts are noindex. Search engines see mixed signals.

robots.txt glitch

The rule `Disallow: /*&s=` contains an HTML-escaped ampersand and never matches. It should be `Disallow: /*s=`.

Broken links and duplicate pages

Sitewide: broken footer phone button

Every page links to `http://(443)%20708-4698` . Tapping it on mobile opens an error instead of dialling. Change to `tel:+14437084698` .

Broken internal links (404)

URL	LINKING PAGES
/washington-dc-staging/	6
/property-management-in-baltimore/mt-vernon/	3
/blog/what-terms-should-be-included-in-a-lease-agreement/	1
/property-management-in-philadelphia/	1

Also: 62 internal link targets go through a redirect, including /contact (no slash) on 2,087 pages.

Indexable duplicates and leftovers

URL	PROBLEM
/blog/velkommen-til-bloggen-min/	Theme demo post
/philadelphia/temple-university-property-management-duplicate/	Duplicate page
/baltimore-property-management-company-ga/	Ad landing copy
/property-management-company-in-northern-virginia-ga/	Ad landing copy
/blog/budget-home-improvement-ideas/ + ...-on-a-budget/	Duplicate posts
/blog/going-green-reducing-your-rental-...impact/ (×2)	Duplicate posts
/unsubscribe/	Utility page

The demo post's title is "Just another post with A Gallery". All are indexable with self-referencing canonicals.

Trust signals (E-E-A-T)

Checks passed by category · 56 of 69 overall

Authority & technical		10/10
Homepage checks		5/5
WordPress leftovers		3/3
On-site E-E-A-T		10/12
UX elements		4/5
About Us page		7/9
Social presence		6/8
Footer E-E-A-T		7/10
E-E-A-T pages		4/7

Source: WordPress 69-point E-E-A-T audit on the homepage

Gaps worth closing

- **No Terms of Service page.** Also required for SMS consent on the lead forms.
- **No public email address** in the footer or page HTML.
- **Every external link is nofollow**, including the sister site texasbmg.com, social profiles and NMLS.
- **No editorial guidelines** for a 1,885-post blog.
- **6 generic "Read More" links** on the homepage without descriptive labels.

Not worth chasing for this business: DMCA badge, TikTok, back-to-top button.

Content: deep, but hard to read

95

median quality score

37

Flesch reading ease

13

grade level

2,097

median post words

- **Readability.** Copy reads at college level. Aim for grade 8 to 10 on service and city pages.
- **Repetition.** "Property management" exceeds 3.5% on 71 of 172 sampled pages (Kensington 6.9%, Germantown 6.5%). The brand name inflates this.
- **Structure.** 12 posts have two H1s; 5 pages have none. 977 titles exceed 60 characters.

Source: content and keyword scripts on all 132 live pages + 40 random posts

Thinnest indexable pages

/locations/maryland/		68 words
.../resources/dauphin-county/		117 words
.../resources/chester-county/		119 words
.../resources/baltimore-city/		127 words
.../resources/harford-county/		127 words
.../resources/bucks-county/		129 words
.../resources/delaware-county/		129 words
/locations/		131 words

Main-content words. Expand each county resource page with local landlord rules, licensing and fees, or merge into one hub.

Remaining actions

PRIORITY	AREA	ISSUE	FIX
Medium	Links	4 broken internal links	/washington-dc-staging/ (6 pages), /property-management-in-baltimore/mt-vernon/ (3), 2 blog links.
Medium	Links	62 internal links through redirects	Link menu/footer to /contact/ (2,087 pages); update Harrisburg, Towson, Owings Mills, Parkville, Silver Spring links.
Medium	Trust	All external links are nofollow	Remove nofollow from texasbmg.com, social profiles and NMLS.
Medium	Trust	No Terms of Service or public email	Publish Terms (also needed for SMS consent); add an email to the footer.
Medium	Content	Copy reads at college level	Median grade 13. Shorten sentences on service and city pages; target grade 8 to 10.
Medium	Content	15 thin county resource pages	117 to 170 words each. Expand with local rules and fees, or merge into one hub.
Medium	Accessibility	Zoom disabled, contrast, labels	Remove user-scalable=no; fix contrast, unlabeled links/fields, iframe titles.
Low	Content	Long titles, missing category metas	977 titles over 60 characters; 50 category pages without meta descriptions.
Low	Content	H1 structure	12 posts with two H1s; /blog/, /privacy-policy/, /sitemap/, /locations/maryland/ have none.
Low	Accessibility	Author avatar alt text	6,113 images on 1,912 pages. One fix in the post template's author box.
Low	Content	'Property management' repetition	Kensington 6.9%, Germantown 6.5%, Fishtown 6.1%. Brand name inflates density.
Low	Indexing	robots.txt and slug glitches	'Disallow: /*&s=' should be '/*&s='; valley-forge slug has a hidden Unicode character.

Suggested roadmap

WEEK 1

Quick wins

- ☐ Repair the footer phone link
- ☐ Exclude hero from WP Rocket background lazy-load; preload hero
- ☐ Clean sitemap (redirects, careers)
- ☐ Delete demo post, '-duplicate' page; noindex '-ga' pages and /unsubscribe/
- ☐ Fix 4 broken links and robots.txt

WEEKS 2-3

Speed and trust

- ☐ Consolidate Google tags into GTM
- ☐ Load reCAPTCHA and Formidable only on form pages
- ☐ Remove nofollow from trusted links
- ☐ Publish Terms of Service; add footer email
- ☐ Enable pinch-zoom; fix contrast and labels

MONTH 2

Content

- ☐ Expand or merge 15 county resource pages
- ☐ Simplify copy on top service and city pages
- ☐ Merge duplicate post pairs; update redirecting links
- ☐ Category meta descriptions; shorten long titles
- ☐ Re-test Lighthouse and check Search Console CWV

Timeline is an estimate for one WordPress developer. Re-run this audit after Month 2 to measure the change.

What is already working, and how we measured

2,120 / 2,120

sitemap URLs return HTTP 200

30–50 ms

HTML response via Cloudflare APO

100

Lighthouse SEO on every page tested

96

desktop performance on the homepage

2,097

median words per blog post

552

posts updated during 2026

288

URLs with FAQ schema

1,633

tag archives correctly noindexed

Method

Full crawl of all 2,120 sitemap URLs plus 1,710 linked URLs (status, redirects, titles, meta, H1, canonical, robots, schema, images). Enterprise SEO scripts on the homepage and 172 pages. Lighthouse 12.8.2 on five templates. Suspicious results were re-checked against the raw HTML.

Not covered

Backlinks, rankings, Google Business Profiles, Search Console and real-user CrUX data. Speed figures are lab measurements; confirm them in Search Console's Core Web Vitals report.
